

# COMPOUND 1-2-3-50

## TECHNICAL DATA SHEET

### **DESCRIPTION:**

**COMPOUND 1-2-3-50** is a very concentrated liquid of ideal composition for exterior washing of cars, trucks, buses and similar transportation equipment. It is safe on all metals and materials of construction. **COMPOUND 1-2-3-50** is effective in the hardest water and maintains high stable suds that eliminate "mitt drag". The user will find that it rinses completely, is non-filming, non-hazing, non-streaking and non-spotting.

### **PROPERTIES:**

Appearance:	Yellow, viscous liquid with a lemon odor.
Specific Gravity:	1.0
pH (100%):	6.5 – 7.5
Detergency:	Excellent for all road soils.
Foaming:	Produces a high, stable foam.

### **APPLICATION:**

**COMPOUND 1-2-3-50** is highly recommended for safe exterior cleaning of all types of transportation equipment such as passenger cars, buses, trucks, taxicabs, trailers and similar vehicles. It is also an excellent upholstery shampoo and general-purpose cleaner for car interiors.

For most exterior cleaning, use **COMPOUND 1-2-3-50** at a dilution of 1/2 oz. / gallon of tap water. For very dirty surfaces and /or where extremely heavy suds are desired, use 3/4 to 1 oz. / gallon.

As an upholstery shampoo, 1 part / 50 parts tap water is excellent, but the concentration may be safely varied to suit particular conditions. For cloth fabrics, best results are obtained by using the voluminous suds formed at this concentration, whereas for plastic and leather upholstery the solution is best.

For general interior cleaning including windows, a 1:50 to 100 dilutions in tap water is recommended.

### **PRODUCT CAUTIONS:**

Do not take internally! May be harmful if swallowed. Contains glycol ethers. Avoid contact with eyes. During use, wear safety eyewear to protect against unexpected splashes.

### **EMERGENCY FIRST AID:**

**EYES & SKIN:** Immediately flush with large quantities of cool water continuously for at least 15 minutes. Call a physician. Remove contaminated clothing and shoes. Do not put contaminated clothing and shoes back on. Wash clothing and shoes thoroughly in soap and water; rinse repeatedly in clean water and dry before reuse.

**INGESTION:** Drink large quantities of water. Never give anything by mouth to an unconscious person. Call a physician.

If use is contemplated for purposes other than, or by methods different from those specifically recommended herein, please contact the manufacturer for advice.

**FOR INDUSTRIAL USE ONLY – KEEP OUT OF THE REACH OF CHILDREN.**
